SUMMARY

AI Full Stack Developer with experience building intelligent web applications using Python, Django, React, REST APIs, LangChain, LLMs, Vector Search, and Retrieval-Augmented Generation (RAG). Developed AI-powered documentation assistants and full-stack applications with modern frontend frameworks and scalable backend architectures. Passionate about Generative AI, AI Agents, and production-ready AI solutions.

EDUCATION

DHIRAJLAL GANDHI COLLEGE OF TECHNOLOGY

Bachelor of Technology Artificial Intelligence and Data Science , CGPA – 8.13 2022 – 2026

AVVAIYAR GIRLS HIGHER SECONDARY SCHOOL

HSC (Class 12) – 79.3% 2021 – 2022

AMALA HIGHER SECONDARY SCHOOL

SSLC (Class 10) – 78.2% 2019 – 2020

WORK EXPERIENCE

FULL STACK INTERN – MIKROSUN TECHNOLOGY

AUG 2024 – SEP 2024

- Learned Python with advanced concepts of backend technologies.
- Built an e-commerce web application using React.js with in-depth hands-on with Hooks.

PRODUCT DEVELOPMENT – FOCUSR TECHNOLOGIES

SEP 2025 – JUN 2026

- Developed and deployed REST APIs using Python, Django, and DRF for real-time web applications.
- Built backend APIs for an HR Chatbot and Lead Hunter Application, handling data processing and core logic.
- Created API documentation and participated in project presentations and technical demonstrations.

PROJECTS

LangChain Documentation Helper

Technologies: Python, LangChain, Pinecone, OpenAI, Streamlit, Tavily

- Developed an AI-powered documentation assistant using LangChain and Retrieval-Augmented Generation (RAG).
- Implemented vector search using Pinecone for semantic document retrieval.
- Integrated LLMs for context-aware question answering.
- Built an interactive Streamlit interface for user interaction.
- Improved response accuracy through document chunking, embeddings, and retrieval pipelines.

AI Resume Analyzer

Technologies: Python, NLP, Scikit-learn, spaCy, Flask/Streamlit, Pandas

- Developed an AI-powered resume analysis system to evaluate ATS compatibility and job readiness.
- Implemented Natural Language Processing (NLP) techniques for resume parsing, skill extraction, and keyword matching.
- Designed an intelligent scoring system to generate ATS score based on relevance and structure.
- Provided personalized feedback on missing skills, improvements, and job-role alignment.
- Built an interactive web interface for uploading resumes and displaying real-time analysis results.

TECHNICAL SKILLS

- **Programming Languages** : Python, Javascript
- **Frontend Technologies** : HTML5, CSS3, Tailwind CSS, React.js, Next.js
- **Backend Technologies** : Django, Django Rest Framework(DRF)
- **Gen AI Skills**: Large Language Models (LLMs), LangChain, Prompt Engineering, Retrieval-Augmented Generation (RAG), Pinecone Vector Database, Embeddings, AI Agents, OpenAI API, Tavily Search, Context Engineering, and Document Processing.
- **Database** : MySQL (Basics)
- **API Development**: REST APIs, API Integration
- **Tools & Platforms**: Visual Studio Code, Git, Github, Vite, Vercel
